Women and Low Pay: a focus of the recent NERI QEO

1. Introduction

- Recent research on low pay
 - A revival of interest
 - Greater interest in the direct income distribution
- Women = group with a high probability of low pay
- Policy interest:
 - Government
 - Low Pay Commission
- Yet, limited detailed knowledge...

Chart 4.1: Low Pay across the OECD (% full-time employees in 2013)

Source: OECD online database (OECD.stat)

Note: Low pay is defined as those earning less than two-thirds of the median hourly pay received by full-time workers.

Chart 4.2: Low Pay in the Republic of Ireland, 1997-2013 (% full-time employees)

Source: OECD online database (OECD.stat)

Notes: Data unavailable for 1998, 1999, 2001 and 2002. Low pay is defined as those earning less than two-thirds of the median hourly pay received by full-time workers.

2. Data & Research Q's

Data

- CSO data from SILC 2013
- Looking at hourly earnings data for employees
- Low Pay thresholds:
 - Two-thirds of median hourly earnings (specified group)
 - **€11.45** per hour

Research Questions:

- Previous examinations found women more likely to be low paid, so:
 - Who are these low paid female workers?
 - How far below the low pay threshold is their pay?
 - How important is this income to their living standards?

3. Female Low Pay in Profile

Women and low pay

- Details table 4.1a and 4.1b (see p34-35)
 - 60% of the low paid are women = 207,000
 - Almost 3 in 10 women are low paid (men = 2 in 10)
 - Across the age groups; but concentrated in under 40s
 - 60% in three sectors
 - Wholesale and Retail (24%)
 - Accommodation and Food (19.7%)
 - Health and Social Work (18.4%)
 - Temporary contract: 1 in every 2 are low paid
 - Regional: lowest concentrations in SE, W and Midlands

4. Depth of Low Pay

How far below €11.45 per hour are low paid women?

- Average depth for female employees = €2.04 per hour

Chart 4.3: Mean and Median Hourly Wages for Low Paid Employees

Note: Low paid employees represent all those who earn less than €11.45 per hour.

5. The Importance of Low Pay

How important is low pay income?

- % of household earnings

Table 4.3 How Important is Low Pay Income?

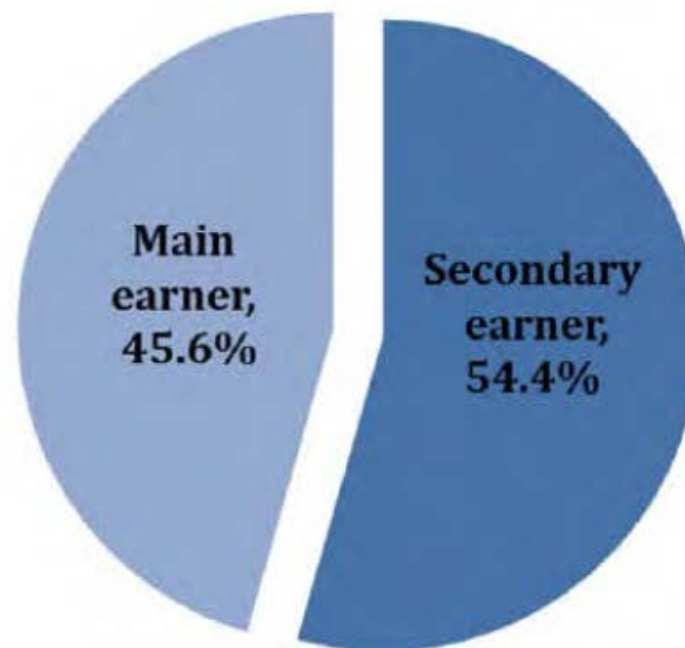

% of Household Earnings	All Low Paid	Low Paid Males	Low Paid Females
0.01%-9.99%	7.0%	6.0%	7.6%
10%-24.99%	17.2%	12.5%	20.3%
25%-49.99%	26.2%	25.6%	26.6%
50%-74.99%	10.3%	13.9%	8.0%
75%-99%	4.2%	5.3%	3.4%
100%	35.2%	36.8%	34.2%
Mean %	58.0%	62.1%	55.3%
Median %	49.4%	61.9%	46.4%

Notes: Figures represent the earnings of the low paid employee as a percentage of the total earnings from employment and self-employment in the household. Decompositions significant at the 5% level.

Chart 4.5: Distribution of Low Paid Female Earners in the Income Distribution, by Main Earner and Secondary Earner

6. Next Steps

- A forthcoming research paper
 - 2014 data update
 - Econometric analysis to do
 - However, not all that different to overall picture...
- Points to:
 - Adequacy issues regarding pay in certain sectors
 - Sustainability/stability of that employment income
 - role beyond hourly rates
 - barriers to work and more work
